

B. Amendments to the Claims

Please cancel claim 12 without prejudice or disclaimer.

Please amend claim 11 as follows:

1-5. (Cancelled)

6. (Previously Presented) A structure comprising:

an electrical conductor;

an insulator formed on the electrical conductor; and

an anodized layer formed on the insulator,

wherein the insulator has a first group of holes and the anodized layer has a second group of holes,

wherein each one hole of the first group of holes is connected with a corresponding one hole of the second group of holes, and

wherein holes of the second group are connected with the electrical conductor.

7. (Previously Presented) The structure according to claim 6, wherein the electrical conductor consists of Si.

8. (Previously Presented) The structure according to claim 6, wherein the insulator consist of SiO₂.

9. (Previously Presented) The structure according to claim 6, wherein

the insulator contains a resist.

10. (Previously Presented) The structure according to claim 6, wherein the holes of the first group extend to the electrical conductor.

11. (Currently Amended) A structure comprising:
an electrical conductor;
an insulator formed on the electrical conductor; and
an anodized layer formed on the insulator,
wherein the insulator and the anodized layer have columnar parts, which are composed of a magnetic material.

wherein the columnar parts extend at least into the insulator and the anodized layer, and
wherein bottoms of the columnar parts contact the electrical conductor.

12. (Cancelled)

13. (Previously Presented) The structure according to claim 11, wherein the electrical conductor consists of Si.

14. (Previously Presented) The structure according to claim 11, wherein the insulator consists of SiO₂

15. (Previously Presented) The structure according to claim 11, wherein the insulator contains a resist.
